United Asphalt Release

Product Data Sheet

Product Description:

United Asphalt Release General purpose, chemically active asphalt release agent is a non-solvent and non-petroleum based lubricant that is completely biodegradable. The non-hazardous, all natural based agent is designed to provide clean, rapid and easy separation of asphalt and other bituminous materials from the beds of haul trucks and dump trucks. This environmentally friendly, low foaming lubricant contains a derived soy oil based polymer that when applied to the surface of the truck bed

Outstanding Qualities:

1. Prevention of the buildup of deposits on the bed.
2. Prevention of pick-up, sticking and buildup of asphalt on the rollers of compactors.
3. Complete biodegradability. United Asphalt Release contains components that are biodegradable, thus minimizing environmental concerns associated with spillage of any residual product onto the ground during unloading.
4. Removes previous residue left by previously used inferior release agents.

Typical Specifications:

Flash Point °C/°F	>150/302
Viscosity, 40°C, cSts	5.258
Avg. Lbs/Gal @ 23°C	7.3

Ready to use or can be formulated for water miscibility
